

Gianetti Introduces 22.5 x 9.00 Steel Wheel

Only 34 kilos!

Gianetti's latest breakthrough: 22.5 x 9.00 steel wheel weighs only 34 kilos

As customers strive to optimize total weight, fuel economy and emissions of their equipment, Gianetti Ruote is there. We continue to refine our product designs and manufacturing processes to lower the weight of our steel wheel offering.

A leading producer of steel wheels for Europe's commercial vehicle industry, Gianetti Ruote has maintained our heritage of leadership in product technology and innovation for over 130 years. We are proud to introduce our latest breakthrough: **our first 22.5 x 9.00 steel wheel to weigh only 34 kilos!** This new design is the result of our product design expertise applied to the exceptional properties of new HSLA steel.

Look for more steel wheel design innovation soon, only from Gianetti Ruote.

Features

Weighs only 34 kilograms for higher payload and lower emissions.

Features safety hump in the rim area needed by truck OEMs.

Design and engineering processes enable us to reduce weight without changing the disc thickness.

Meets stringent biaxial test requirements demanded by leading truck OEMs.
